

**REMARKS**

Claims 1-15 are all the claims pending in the application.

**35 U.S.C. § 103:**

Claims 1-15 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Jantzen (U.S. Patent 3,857,531) in view of Tsuyuki et al. (U.S. Patent Appln. Pub. No. 2001/0028010 [hereinafter “Tsuyuki”]).

To expedite prosecution, Applicant amends independent claims 1 and 13 to recite “wherein the reinforcing ring is a cylinder which is shorter than the cylindrical recess portion of the reel hub, and the reel hub and the reinforcing ring have shapes for holding the reinforcing ring at a top end portion of the reel hub.”

As is shown in at least the exemplary embodiment of Figure 7, a reinforcing ring 96 is attached to a reel hub 60 such that top portions thereof are engaged. As is also shown, the reinforcing ring is shorter than a cylindrical recess portion of the reel hub. These features provide aspects not disclosed by the art.

Jantzen does not disclose, teach or suggest that the applied ring 20 is a cylinder which is shorter than the cylindrical recess portion of the reel hub, and that the reel hub and the ring have shapes for holding the ring at a top end portion of the reel hub. Accordingly, Applicant respectfully submits that claims 1 and 13 are not anticipated by Jantzen. Likewise, claims 2-12, 14 and 15 are not anticipated by Jantzen at least by virtue of their respective dependences on claims 1 and 13.
